

# Shellie Krotz

Applications Dev. & Support III, Healthcare Information Systems – Applications Division, IDX Team for Patient Accounting Systems

## In Shellie's own words:

I have had wonderful supervisors. They have been mentors and facilitators. They helped me build my self-confidence.

My experience in database design working on the Faculty Practice Plan led to me applying to the one time offering of the Systems Training program. I received Oracle training both on and off campus. After I successfully completed that training, I was promoted to Database Analyst 1.

Most of my training has been on the job and very hands-on. I have always been willing to accept new assignments and learn new skills. That opened many doors for my career development.

If you dig in and are willing to take on new challenges, there are all sorts of possibilities at the University. I started working here thinking I would stay a year until I figured out what I wanted to do. That was 20 years ago. I have been very happy with the variety of opportunities I've been given.
