

In support of the University of Iowa's mission, Investigators using the resources of the Central Microscopy Research Facility (CMRF) agree to properly acknowledge the Office for the Vice President of Research (OVPR) and the CMRF when presenting or publishing any data generated within the facility. Where appropriate, CMRF staff should be considered for authorship.

*This recognition is extremely important in support of grant applications and renewals, staff advancement, and demonstrating successful support of investigators using the Microscopy Facility. This information will also strengthen the CMRF's annual report.*
