

Minor

Undergraduate students in the Colleges of Liberal Arts and Sciences, Education, Engineering, Nursing, or the Tippie College of Business may complete a minor in aging studies by taking 15 s.h. in courses outside of their major department or college. The courses must be approved by the Aging Studies Program; the minor must be approved by the student's college or major department.

Students are required to complete an introductory core course (153:108) and one course in each of the three focus areas: psychological aspects of aging, biological/health aspects of aging, and social and cultural aspects of aging. At least 12 of the 15 s.h. must be taken in advanced courses (numbered 100 or above) at The University of Iowa. Students must have a g.p.a. of at least 2.00 in all work in aging studies.
